2.0 INPUT SPECIFICATIONS

2.1 Input voltage

The range of input voltage is from 90VAC to 264VAC. Nominal line 115VAC/230VAC.

2.2 Input frequency

The range of input frequency is from 47Hz to 63Hz.

2.3 Input current

The maximum input current is 3A at 115VAC or 1.5A at 230VAC.

2.4 Inrush current

The inrush current will not exceed 30A at 115VAC input or 60A at 230VAC input, cold start at 25°C. (EMI capacitors excluded)

2.5 Standby input power

Input power is less than 0.5W at 0.25W output (remote off) and 115Vac/230Vac input.

3.0 OUTPUT SPECIFICATIONS

3.1 Load range

output	min. load	rated load	max. load	peak load	voltage range
+24V	0A	8.3A	12.5A	16.5A	21.6V to 26.4V
+5Vsb	0A	1A			4.25Vto 5.65V

3.1.1 Factory adjustment

At factory, the output in 60% rated load and nominal line condition, the +24V output is set to between 23.95V and 24.05V. The +5Vsb output is checked to be within the specified voltage accuracy range.

At peak load and nominal line, the output can last for 5sec without shut down.

3.1.2 Total output power

200W with convection cooling, 200W~300W with 10CFM forced air cooling.

3.2 Ripple and noise

The peak to peak ripple and noise for each output is less than 1% Vo at rated load and nominal line. Measuring is done by 15MHz band width limited oscilloscope and terminated output with a 0.47uF +47uF capacitor.

3.3 Line regulation

The line regulation for each output is less than + -1% while measuring at rated load and + -10% of nominal line input voltage changing

3.4 Load regulation

The load regulation for each output is less than + -1% measuring are done by changing the measured output load + -40% from 60% rated load and nominal line

3.5 Capacitive load capability

The capacitance load start-up capability of +24V can be up to 10000uF at rated load and nominal load.

3.6 Surge load capability

The output current can provide 300% rated current within 1000ms, and output Voltage can keep above 55% output Voltage.

3.7 Remote sense (SNP-P209-SC without Remote sense)

The +24V output has remote sense capability, compensation for 0.5V lead drop max.

4.0 GENERAL FEATURES**4.1 Efficiency**

The efficiency is typical 90% while measuring at nominal line and rated load.

4.2 Hold up time

The hold up time is higher than 16mS at 115VAC input and rated load, which is measured from the end of the last charging pulse to when the main output drops down to 95% output voltage.

4.3 Protection**4.3.1 Over current protection**

Trip point :110% to 130% Maximum load.

Protection mode : Auto-recovery.

4.3.2 Short protection

Protection mode : Auto-recovery

4.3.3 Over voltage protection

+24V trip point :+27V to 31V.

+5Vsb trip point :+7V to +9.5V.

Protection mode : Latch-off.

4.4 Remote on/off control

The TTL compatible signal (active low) is use to switch on the output. When remote pin is disconnected from secondary common, the output shall turn off

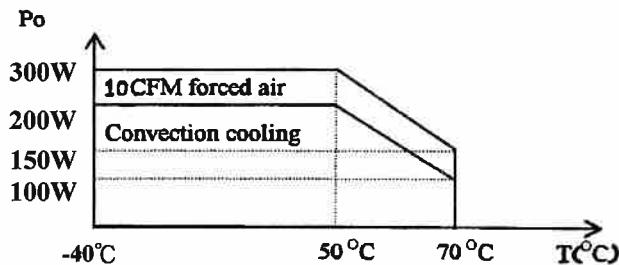

4.5 Fan speed control (SNP-P209-SC without Fan control)

The Fan output is only activated white > 50% ±10% of rated load.
